G&S Liquid Colours

These high performance silk or cotton liquid paints are wash-fast, radiant, and extremely pliable. These paints are easy to use and fixed by ironing. Painting with G&S Liquid Colours is very similar to using a dye without the fixation by steam which was the main deterrent to many beginner silk painters. Many painting techniques such as salting and blending are still easily achieved. As an added bonus, they are great for working on cottons for background washes, blends and gradients.

Please visit our website or email us for pricing information.

How to use G&S Liquid Colours

Step 1 - Wash fabric with T.N.A. soap to remove dirt and sizing. For cottons, preshrink your fabric.

Step 2 - Shake paints before using.

A variety of technique can be created with G&S Liquid Colours such as traditional silk painting, scrunch dyeing, washes, gradations and more. To create lighter colours, add 3 parts water to your Diluent (LCoo) and then add this mixture to your paints. G&S Liquid Colours are also suitable for airbrushing.

Step 3 - To fix the paints, iron on a low cotton setting (150C) for 3 minutes.

Step 4 - Wait 24-48 hours before washing to achieve brighter colours. Wash in luke-warm water with T.N.A. soap until water runs clear.

Safety

Store in a cool, dark place.

Product is non-toxic and water based. Keep out of eyes and mouth and always supervise young children.

MSDS available upon request.
