G&S Liquid Colours

These high performance silk or cotton liquid paints are wash-fast, radiant, and extremely pliable. Fixation by steam has remained the main deterrent to many beginner silk painters. These paints are easy to use and fixed by ironing. Painting with G&S Liquid Colours is very similar to using a dye. Many painting techniques such as salting and blending are easily achieved. As an added bonus, they are great for working on cottons for background washes, blends and gradients.

Step 1

Wash fabric with T.N.A. soap to remove dirt and sizing. For cottons, preshrink your fabric.

Step 2

Shake paints before using.

A variety of technique can be created with G&S Liquid Colours such as traditional silk painting, scrunch dyeing, washes, gradations and more. To create lighter colours, add 3 parts water to your Diluent (LC00) and then add this mixture to your paints. G&S Liquid Colours are also suitable for airbrushing.

Step 3

To fix the paints, iron on a low cotton setting (150C) for 3 minutes.

Step 4

Wait 24-48 hours before washing to achieve brighter colours. Wash in luke-warm water with T.N.A. soap until water runs clear.

Safety

Store in a cool, dark place.

Product is non-toxic and water based. Keep out of eyes and mouth and always supervise young children. MSDS available upon request.
