

# DISCHARGE PASTE

FOR REMOVING AREAS OF COLOUR  
FROM DYED NATURAL FABRICS

## Directions:

Apply to fabric with a brush. Thin with water if necessary for penetration into fabric. When paste is dry, iron with a steam iron on lowest steam setting. The more steam the better. Colour will leave the fabric at this stage. Wash or rinse fabric with water to return it to its natural softness. Discharge paste works well for dyes on natural fabrics. There are occasional fiber reactive colours which are not susceptible to colour removal. Test samples should be prepared prior to production runs.

## Caution:

A strong odour is given off during the steam ironing step. Contact with eyes and skin may cause irritation. Ingestion may result in gastric disturbances. Inhalation of vapours while ironing may result in respiratory irritation. Wear an approved organic vapour/mist respirator if necessary. Use in well ventilated area. Keep this product away from children. MSDS available on request
