## G&S Pigment System

Pigments are highly concentrated tint colours that are added to a Transparent Base to make fabric paint for hand painting or screen printing. Can also be used to tint acrylic paints, latex house paint or any brand waterbased medium/paint. Different shades of colour are achieved by varying the quantity of pigment added (3-6% solution). These pigments and paints are completely inter-mixable to achieve an even larger pallet of colours. Our current line of pigments are all 100% solvent free and organic based.

Please visit our website or email us for pricing information.

\* 750 White is solvent free but in-organic colourant
